malfunctions in three components of the system technology structure and behavior He analyzes these malfunctions offers ways to repair them and considers technology from the viewpoints of both transferrer and receiver whose missions goals and objectives are often not only disparate but sometimes in conflict He then offers what he calls prescriptive frameworks and guidelines to help implement transfer and to see it as a variable that must be integrated into national development planning Throughout Madu makes it clear that the objective of technology transfer is the maximizing of social welfare Using this overarching premise he is able to evaluate both the benefits and the social costs associated with technology transfer and to develop his prescriptive integrative models Intended for specialists in international finance and development and international business management Madu s book will be of special value to teachers of graduate courses in socio economic development public policy and economics and to policymakers throughout government
