The Medium Is Still the Message Grant N. Havers, 2025-09-15
The Medium Is Still the Message presents Marshall McLuhan history's foremost philosopher of media as the indispensable guide for understanding the impact of technologies McLuhan 1911-1980 shows that media are not simply tools of communication they create new environments with transformational effects on politics economics culture identity religion and nature Grant N Havers argues that McLuhan's key insight the medium is the message is even more relevant today as humanity grapples with the unintended effects of new media As McLuhan demonstrated a lack of understanding about the power of media technologies allows these entities to become idols that enslave their makers At the same time they encourage human beings to act like gods who can reinvent reality itself all the while leading to the decline of literacy the weakening of democracy the resurgence of tribalism within the global village and the elusive search for identity in cyberspace *The Medium Is Still the Message* ultimately offers good news using McLuhan's insights human beings can escape the technological cave that they have fashioned for themselves

Understanding Media Theory Arjen Mulder, 2004 Among students at universities and colleges of higher education as well as in the written press one can ascertain a growing interest in media theory There is a conveyor belt of books about new media but what seems to be missing is knowledge and understanding of the classical media theories of Ernst Cassirer Susanne Langer Harold Innis Marshall McLuhan Claude Shannon Gregory Bateson Vilém Flusser Friedrich Kittler and many others In *Understanding Media Theory* the ideas of these theoreticians and philosophers are explained and applied in a clear and accessible way not by discussing the writers one by one but by using real examples and analyzing them on the basis of concepts developed in media theory Consequently this volume is accessible to a broad public though it is primarily intended for students and teachers of media studies The main thrust of media theory is the analysis of how a society is altered by the technical characteristics of the various media it encompasses Media theory therefore examines popular culture as well as the arts journalism as well as philosophy scientific as well as general insights mass media as well as individualized media Media theory claims to offer an explanation for all historic and social phenomena **Understanding Media Culture** Jostein Gripsrud, 2017-09-07 This refreshingly different introduction to media studies offers an understanding of the mass media which is critical but which does not deny the pleasures they offer Reflecting the trends of today's media and cultural studies courses it introduces students both to social scientific approaches and those of the humanities and aesthetics *How to Read a Film* James Monaco, 1977 Echoes and Reflections Lance Strate, 2006 The author describes the interdisciplinary communication centered field of media ecology the study of media as environments a field that encompasses the study of technology symbol systems and aesthetic form in addition to traditional conceptions of media and mediation This book provides the first comprehensive overview of the field followed by a case study concerning the relationship between modes of communication and constructions of the self *American Folklore Studies* Simon J. Bronner, 1986 *Understanding the Media* Eoin Devereux, 2007-07-25 The second edition of *Understanding the Media* updates what has been recognised as a successful introduction to the study of the mass media The author furnishes examples from all around the world underpinning the emphasis the book places on the concept of globalisation in understanding the modern media The readings and questions force students to reflect critically on issues and encourage them to explore their own media consumption

habits The chapters are well organised and user friendly with the chapter on globalisation highly recommended Introductions to media globalisation often fail to provide a succinct and clear overview for first year students this chapter cracks the problem with a pithy description of the basic concepts and debates interlaced with illuminating case studies and illustrative examples The strength of Eoin Devereux s text is that the examples are familiar and relevant to present day students and his style does not patronise or talk down to them Clearly written comprehensive well organised and up to date This is an excellent introductory text for media studies students Times Higher Education Praise for the first edition An interesting book to read written in a simple and transparent style and interlaced with topical up to date examples of media events Journal of Educational Media This is a well organized well informed student friendly textbook ideal for first year undergraduates as a kicking off point into the field of media and communications research It deserves to be widely taken up European Journal of Communication Understanding the Media introduces key theoretical issues in media analysis and encourages students to use case studies to examine their own personal media use and exposure Devereux applies a model of media analysis that gives equal weight to the production content and reception of media texts A particular emphasis is placed on understanding the mass media in a social context and readers are invited to engage with a variety of questions about the increasingly complex mediascape in which we live our everyday lives Now thoroughly revised and expanded this Second Edition Includes an additional chapter which draws together the book s key themes Contains new and revised case studies with expanded discussions on media audiences and fandom and blogging New and revised extracted readings in every chapter In addition the book is now accompanied by an ancillary website with resources for students as well as slides for tutorials lectures Each chapter contains concise summaries exercises extracts from experts in the field model exam and essay questions as well as directions for further reading and research This practical dimension to Understanding the Media will ensure that the book appeals to both teachers and students of the media in the 21st Century *Etc*,1976 **Presidential Temples** Benjamin Hufbauer,2005 This book explores the visual and material cultures of presidential commemoration memorials and monuments libraries and archives and the problematic ways in which presidents themselves have largely taken over their own commemoration The author sees these various commemorative sites as playing a key role in the construction of our collective political and cultural self images and as another sign of our preoccupation with celebrity culture Ultimately he contends these presidential temples reflect not only our civil religion but also the extraordinary expansion of executive authority and presidential self commemoration since FDR **Face** William A. Ewing,Nathalie Herschdorfer,2006 The first full scale study of the face in contemporary photography a challenge to accepted notions of what constitutes a portrait In this groundbreaking publication William A Ewing announces the death of the conventional portrait In an age when we are bombarded with flawless images of youthful beauty when rejuvenation is available through a jar of cream or a scalpel artists and photographers seek to portray the face in new ways Through a variety of techniques including computer manipulation

photomontage and retouching the artists present their new portraits They replace clarity with blur the split second with the elastic moment reality with hyperreality questioning the notion of a fixed identity of universality of expression of what constitutes beauty Whether Cindy Sherman s disquieting disguises Gillian Wearing s masked self portrait LawickM ller s composite portraits of couples Thomas Ruff s studiously neutral facade or Orlan s disturbing experiments with cosmetic surgery these faces demand attention Other artists represented in the book include Inez van Lamsweerde and Vinoodh Matadin Martin Parr Philip Lorca diCorcia Rineke Dijkstra Lee Friedlander Barbara Kruger and Tibor Kalman 250 photographs in color and duotone *Nonbook Media* David H. Jonassen,1982
