Negotiating Waters: Seas, Oceans, and Passageways in the Colonial and Postcolonial Anglophone World André Dodeman, Nancy Pedri, 2020-01-31 This book examines how seas oceans and passageways have shaped and reshaped cultural identities spurred stories of reunion and separation and redefined entire nations It explores how entire communities have crossed seas and oceans voluntarily or not to settle in foreign lands and undergone identity cultural and literary transformations It also explores how these crossings are represented The book thus contributes to oceanic studies a field of study that asks how the seas and oceans have and continue to affect political narratives of exploration cartography international maritime law identity insularity and literary issues survival narratives fishing stories Divided into three sections *Negotiating Waters* explores the management the crossings and the re imaginings of the seas and oceans that played such an important role in the configuration of the colonial and postcolonial world and imagination In their careful considerations of how water figures prominently in maps travel journals diaries letters and literary narratives from the 17th century onwards

the three thematic sections come together to shed light on how water in all of its shapes and forms has marked lands nations and identities They thus offer readers from different disciplines and with different colonial and postcolonial interests the possibility to investigate and discover new approaches to maritime spaces By advancing views on how seas and oceans exert power through representation *Negotiating Waters* engages in important critical work in an age of rising concern about maritime environments

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 *Climate Fiction and Cultural Analysis* argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term's speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions *Climate Fiction and Cultural Analysis* shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally
