Wing Beats:

Wing Beats of the Florida Mosquito Control Association, 2004 **Nature's Flyers** David E. Alexander, 2004-11-17

Nature's Flyers is a detailed account of the current scientific understanding of the primary aspects of flight in nature. The author explains the physical basis of flight drawing upon bats, birds, insects, pterosaurs, and even winged seeds. Hawks from Every Angle Jerry Liguori, 2016-08-10. Identifying hawks in flight is a tricky business. Across North America, tens of thousands of people gather every spring and fall at more than one thousand known hawk migration sites from New Jersey's Cape May to California's Golden Gate. Yet as many discover, a standard field guide with its emphasis on plumage is often of little help in identifying those raptors soaring, gliding, or flapping far, far away. *Hawks from Every Angle* takes hawk identification to new heights. It offers a fresh approach that literally looks at the birds from every angle, compares, and contrasts deceptively similar species, and provides the pictures and words needed for identification in the field. Jerry Liguori pinpoints innovative, field-tested identification traits for each species from the various angles that they are seen. Featuring 339 striking color photos on 68 color plates and 32 black and white photos, *Hawks from Every Angle* is unique in presenting a host of meticulously crafted pictures for each of the 19 species it covers in detail: the species most common to migration sites throughout the United States and Canada. All aspects of raptor identification are discussed, including plumage, shape, and flight style traits. For all birders who follow hawk migration and have found themselves wondering if the raptor in the sky matches the one in the guide, *Hawks from Every Angle*, distilling an expert's years of experience for the first time into a comprehensive array of truly useful photos and other pointers for each species, is quite simply a must. **Key Features:** The essential new approach to identifying hawks in flight. Innovative, accurate, and field-tested identification traits for each species. 339 color photos on 68 color plates, 32 black and white photos. Compares and contrasts species easily confused with one another and provides the pictures and words needed for identification in the field. Covers in detail 19 species common to migration sites throughout North America. Discusses light conditions, how molt can alter the shape of a bird, aberrant plumages, and migration seasons and sites. User-friendly format. **The Osprey**, 1897 *Behaviour*, 1979 **The Cosmopolitan**, 1894
